Introduction

Managing In-Year requests to change school places is never an easy task, not least because the process can involve complex parental enquiries, where detailed knowledge of each application is crucial.

The volume of applications to relocate can be in region of 10% of the total school population, who want to move between schools including new incomers to your local authority.

The Citizen Portal for Admissions and Transfers is a powerful extension to the core A&T Module. A convenient online self-service portal for all school applications across your authority. It simplifies the whole process, empowering parents and carers by giving them access to what they need. Typically, it is used for end of phase transfers, but it can be configured to manage In-Year applications.

Because the portal is accessed by families and the back-office elements of One Admissions & Transfers are fully integrated, there's no need for local authority admissions teams to manually add applications, streamlining the management of admissions. With a detailed, easily referenceable history to hand, teams also have all the information they need to manage admissions enquiries, validation and offers, more efficiently and freeing up resources to be invested where they will have the greatest impact.

Benefits

This work package will provide your admissions team with a streamlined project to work to efficiently implement this powerful addition to the A&T Backoffice module.

We will support and guide you from beginning to your first offers being made to parents; sharing good practice from different Local Authorities: working in partnership so you get the most out of the module and can offer a good service to your parents.

- We will start by listening and understanding your local admissions challenges so we appreciate how you can get the best out of the software
- Scoping your requirements to configure your Test environment to suit your needs to support including, customisation of text, UAT testing, to going live with confidence
- Configure your test system to support training and your own user acceptance testing, so you have a smooth experience
- Provide training so you can confidently test, and build you experience of how the integration of this public facing application works with your admissions processes
- Help to set the live environment up so you are ready for parents to apply online, and feel confident that you can maintain and adapt to challenges parents present
- Finally, we don't abandon you once you go live. We follow up to review how you are managing importing applications and responses to applicants

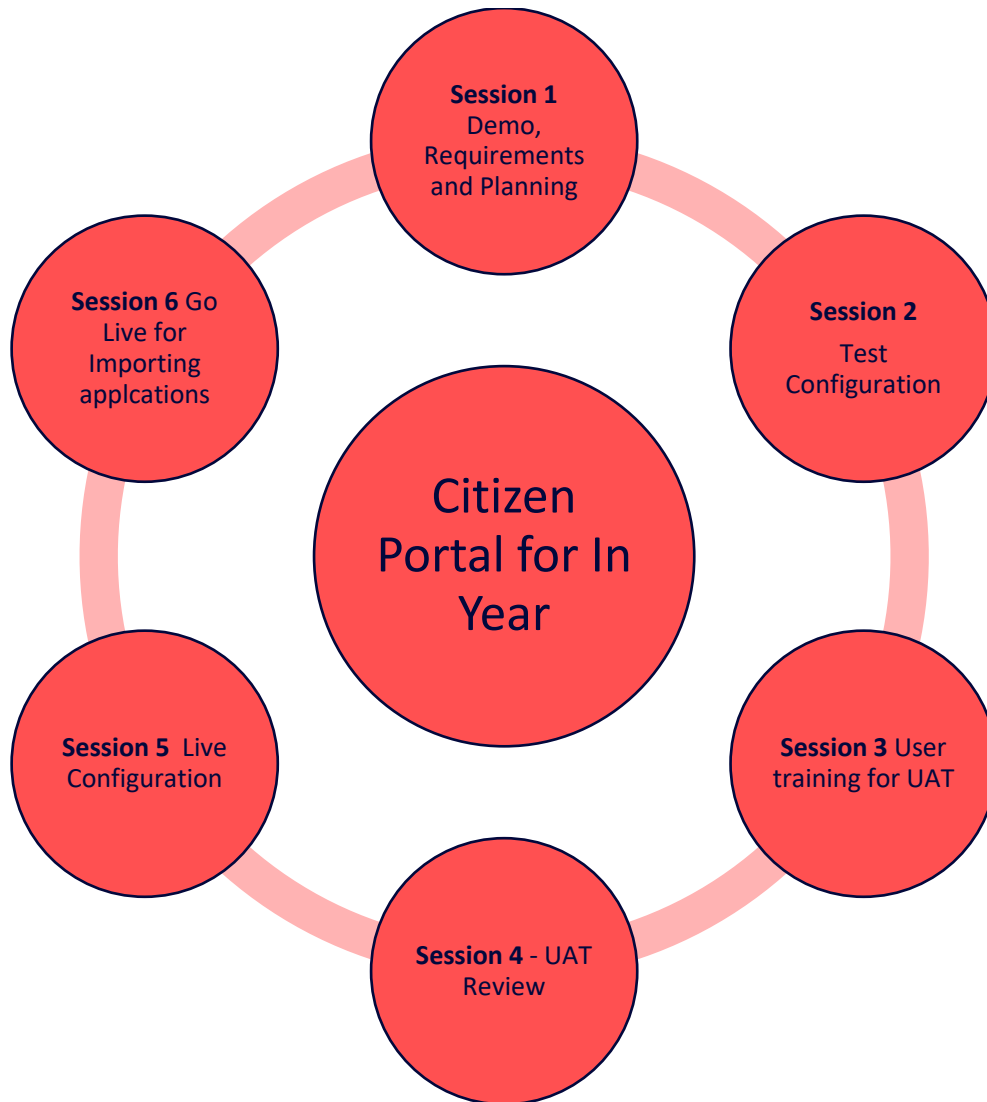

Pre-requisites

To enable us to provide a quality service, the following is required from the Local Authority:

- Have the A&T Backoffice, and Bases module
- Install the licence key into test and do an Ilreset before Session 1, if you don't already use the module
- Remote access for One Technical to install and configure web components if necessary
- Access to participate in Microsoft Teams and or Webex sessions for support and configuration by the knowledge specialist
- One database at the current version or previous version
- Have a test environment that has been refreshed withing the last academic year
- Email service for One configured for One
- File upload configure for One
- Appropriate access to all One Clients for the Knowledge Specialist

Service Overview

Capita will assist in the successful implementation of the Citizen Portal for Schools Admissions by providing the following:

Capita believe in a strong emphasis on a proactive partnership with the customer. The Capita Project Coordinator will work closely with the customer's appointed Project Lead throughout the project to achieve this. The Capita Project Coordinator is the coordinating Capita staff member assigned to the project and is therefore able to respond authoritatively to the needs of the project and will actively and continually monitor progress on all risks, issues, actions, and decision in order to ensure successful delivery.
